Mr. Timothy L. Nord
Hanford Project Manager
State of Washington
Department of Ecology
Mail Stop PV-11
Olympia, Washington 98504-8711

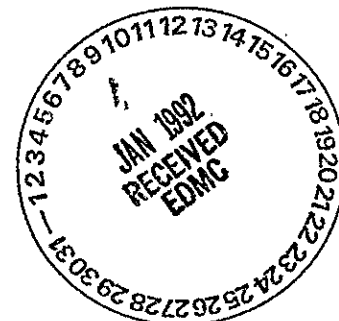

Dear Mr. Nord:

REVISION TO THE HANFORD SITE DANGEROUS WASTE PART A PERMIT APPLICATION
(WA7890008967) (TSD: TS-3-3)

Enclosed is the Dangerous Waste Part A Permit Application Form 3, Revision 3, for the 3718-F Alkali Metal Treatment and Storage Facility (3718-F Facility). The 3718-F Facility was used for the treatment and storage of alkali metal waste from various units and laboratories that used and experimented with alkali metals. The 3718-F Facility halted treatment of waste in June 1987 and storage of the waste in May 1989.

The Form 3 for the 3718-F Facility has been revised to increase the design capacity for treatment of the alkali metal waste in the 3718-F Facility. The increase in design capacity is based on information obtained for the 3718-F Facility Closure Plan, Revision 0, which is scheduled to be sent to the State of Washington Department of Ecology by December 31, 1991 (Hanford Federal Facility Agreement and Consent Order Milestone M-20-18).

Also the Form 3 has been revised to add Dangerous Waste Codes D001 (ignitability), D002 (corrosivity), WT01 (state-only extremely hazardous waste), and WT02 (state-only dangerous waste, if less than four pounds). The addition of these dangerous waste codes is based on information provided by the facility identifying these dangerous waste constituents as being treated and stored at the 3718-F Facility. These dangerous waste codes are added in compliance with the Washington Administrative Code 173-303-805.

Mr. T. L. Nord
91-RPB-042
